

Easy scalability with your own Private Cloud in Australia!

Pay as you consume!

Move from a CapEx to an OpEx model to reduce your internal IT costs. Avoid the hassle of managing traditional infrastructure, escape hardware issues and complicated server provisionin with a Fully Managed Service! No setup or data import fee; only a simple and predictable monthly price for your entire IT infrastructure!

VIRTUAL DEDICATED SERVER SOLUTIONS

For maximum performance, scalability and full protection!

- ✓ Get full control of your own environment and avoids the downsides that come with a shared hosting solution.
- ✓ Ensure recovery and business continuity in case something happens.
- ✓ Easily backup & recover applications, both physical and virtual servers, cloud, PCs, laptops and mobiles... within a single interface!
- ✓ Add hundreds of servers in minutes at the click of a button!
- ✓ Meet regulatory compliance with data retention up to 7 years.
- ✓ 1 or 10Gbps connections to Azure and Amazon Web Services.

UNPARALLELED SECURITY

- Ⓞ ISO 27001, FIPS 140-2 Certified & PCI Compliant Software to deliver uncompromised security
- Ⓞ Replication across multiple Tier-III data centres
- Ⓞ Up to 3 copies of data – geographically dispersed

**AUSTRALIAN WORLD CLASS DATA CENTRES
FEDERAL GOVERNMENT APPROVED**
